

MediBook **Go-To-Market** Marketing Strategy & Plan

WhatsApp-native appointment booking SaaS for Indian dental clinics. Built for Bharat, where every dentist has a WhatsApp number.

📅 FY 2026–2027

🎯 Target: 500 Clinics in 12 months

💰 Revenue Target: ₹2 Cr ARR

📍 IN Market: Tier 1–3 Indian Cities

SECTION 01

Executive Summary

The strategic overview: what MediBook is, what we're selling, and where we're going.

The One-Line Pitch

MediBook lets any Indian clinic run a 24/7 WhatsApp appointment bot in under 10 minutes — no app downloads, no new software, no training required for patients.

Paying Clinics

The Core Insight

India has **500M+ WhatsApp users**. Every patient already knows how to use it. Every clinic already has a WhatsApp number. The gap is automation — and MediBook fills it with a zero-friction SaaS that plugs into Meta's Cloud API, runs per-tenant on PostgreSQL, and costs less than a part-time receptionist per month.

Key capabilities that differentiate MediBook at launch: **dental intent shortcuts** (patients type "braces" or "root canal" and the bot routes them to the right specialist automatically); **voice message support** (patients send WhatsApp voice notes, transcribed via OpenAI Whisper); **waiting list** (full slots convert to future revenue instead of lost patients); **post-appointment 5-star feedback** collection; **session resumption** (incomplete bookings saved for 24 hours); **real-time SSE dashboard**; and a built-in **bot tester** so clinic demos need no Meta credentials.

Go-To-Market Motion

- Land with free trial → convert to paid plan via word of mouth
- Direct outreach to clinic owners via WhatsApp
- Channel partners: dental equipment vendors, IDA chapters
- SEO + YouTube demos for inbound in months 4–12

SECTION 02

Market Opportunity

India's healthcare + WhatsApp intersection is one of the largest untapped SaaS opportunities in the country.

TAM — Total Addressable Market

30,000+ dental
clinics in India. At
₹1,999/mo average
plan, TAM = **₹720
Cr/year**.

SAM — Serviceable Addressable Market

Dental clinics with
active WhatsApp
presence, 1+
dentists, in cities
with reliable
internet (~40% of
TAM). SAM = **₹288
Cr/year**.

SOM — Serviceable Obtainable Market

Year 1 realistic
capture: 500
clinics = **₹2 Cr
ARR**. Year 3 target:
5,000 clinics = **₹20
Cr ARR**.

Market Tailwinds

- **WhatsApp Business API adoption** — Meta is aggressively subsidising BSP onboarding for Indian SMBs in 2025–26
- **ABDM / Ayushman Bharat Digital Mission** — Government pushing digital health records, creating receptiveness to clinic software
- **Post-COVID patient expectations** — Patients now expect digital booking; clinics that don't offer it lose to ones that do
- **Smartphone & data penetration in Tier 2–3 cities** — JioAir + affordable Androids put WhatsApp in every patient's hand
- **Receptionist shortage & cost** — A receptionist costs ₹12,000–18,000/month; MediBook Growth plan costs ₹1,999

Geographic Prioritisation

Phase	Cities	Rationale
Phase 1	Hyderabad, Bengaluru, Chennai, Pune	High tech-savvy clinic owners; founder network; English-comfort
Phase 2	Mumbai, Delhi NCR, Ahmedabad, Jaipur	Volume; dental chains; IDA state chapter presence
Phase 3	Coimbatore, Nagpur, Indore, Lucknow, Kochi	Tier 2 early adopters; lower competition; word-of-mouth driven

Dental Segment Prioritisation

Segment	Appointment Vol.	Priority
General Dentistry (Solo / 2-chair)	Very High	★★★★★
Orthodontics & Braces Clinics	High	★★★★★
Multi-speciality Dental Clinics	High	★★★★
Dental Implant Centres	Medium-High	★★★★
Cosmetic / Smile Makeover Clinics	Medium	★★★
Paediatric Dental Clinics	Medium	★★★
Dental Chains (3+ locations)	High	★★★★

SECTION 03

Target Audience & Buyer Personas

We sell to clinic owners, not to patients. Understanding who signs the cheque is critical.

Dr. Rajesh Mehta

Primary Persona — Solo
Practitioner / Small Clinic
Owner

Age: 35–52 years

Location: Tier 1–2 cities

Clinic size: 1–3 doctors,
30–80
patients/day

Pain: Phone rings
non-stop;
patients miss
appointments;
receptionist
turnover

Decision: Makes buying
decisions
personally,
price-sensitive

WhatsApp: Uses it daily
for both
personal &
patient
communication

Goal: Reduce missed
appointments,
look more
"professional",
free up phone
time

Dr. Suresh Nair

Secondary Persona —
Dental Chain Owner / Multi-
Location Clinic Director

Age: 38–55 years

Location: Tier 1 cities

Clinic size: 3–10+ dentists,
2–5 locations,
100–400
patients/day

Pain: Booking chaos
across
locations;
receptionist
coordination
overhead; no-
show tracking

Decision: ROI-focused;
wants multi-
location
support; needs
analytics per
branch

WhatsApp: Already uses
WhatsApp for
patient
communication
across
branches

Goal: Centralised
booking,
patient data,
per-location
analytics,
reduce walk-in
chaos

Dr. Anita Nair

Orthodontist — Specialty
Dental Clinic

- Clinic:** Single-location orthodontics specialty practice, 1–2 dental chairs
- Location:** Tier 1 city (Bengaluru / Chennai / Pune)
- Revenue:** ₹80,000–₹1,50,000/month
- Pain:** Braces patients need frequent follow-up visits — missing adjustment appointments delays treatment and frustrates patients; manual reminder calls waste staff time
- Decision:** Makes buying decisions personally; willing to pay for tools that improve patient retention
- Goal:** Reduce missed adjustment appointments; free up receptionist from reminder calls; project a professional, tech-forward image to patients

Mr. Anil Verma

Channel Partner — Medical
Equipment/Software
Reseller

- Age:** 35–55 years
- Location:** All cities
- Type:** Dental EMR/practice management software vendor, dental equipment supplier, IDA member
- Pain:** Wants additional revenue streams from existing clinic relationships
- Motivation:** 20–30% recurring commission on referred clinics
- WhatsApp:** Uses it to maintain clinic relationships already
- Goal:** Upsell existing clients; earn passive recurring revenue

Key Buyer Psychology Insights

- **"Dentist referral" is the #1 trust signal** — if Dr. X in the same IDA chapter uses MediBook, Dr. Y will try it
- **Price anchoring against receptionist cost** — a ₹1,999/month plan vs ₹15,000/month receptionist is an easy sell
- **Free trial eliminates risk** — every new client gets a free trial period to experience the value before committing to a paid plan
- **WhatsApp familiarity removes tech fear** — "your patients already know how to use it" is the single most powerful phrase in our sales script
- **No-show reduction is a revenue story** — frame it as "recover ₹X per month in lost consultation fees"

Positioning & Core Messaging

What we stand for, what we say, and how we say it differently from everyone else.

Positioning Statement

"For Indian dental clinic owners and dentists who are losing patients to missed calls and manual booking chaos, MediBook is the only WhatsApp appointment bot that works completely inside WhatsApp — no app download, no complex training, no IT team required. Unlike generic scheduling tools built for the West, MediBook is designed ground-up for Indian dental clinic workflows, regional languages, and the way Indian patients actually communicate."

Message Pillar 1: Zero Friction

"Your patients already use WhatsApp every day. MediBook makes your clinic available on the app they know — no downloads, no signup, no training."

Removes Fear

**Tech-Skeptic
Doctors**

Message Pillar 2: Revenue Recovery

"The average clinic loses ₹15,000–₹40,000/month to no-shows. MediBook's 24h & 2h WhatsApp reminders cut no-show rates by up to 60%."

ROI-Led

CFO / Admin

Message Pillar 3: Speed to Live

"Go live in under 10 minutes. Add your doctors, set their schedule, connect WhatsApp — done. Your bot handles bookings while you sleep."

Urgency

Solo Practitioners

IN

Message Pillar 4: Built for India

"Multi-language support, IST timezone-aware scheduling, Indian date formats, and pricing that makes sense for Indian clinics — not a Western tool bolted on."

Nationalism

Regional Clinics

Message Pillar 5: Security & Trust

"Patient data is encrypted at rest, schema-isolated per clinic, and never shared. ABDM-aligned design. Your data is yours."

Dental Chain
Owners

Enterprise

Message Pillar 6: Insight & Control

"Real-time dashboard shows today's appointments, patient history, doctor analytics, and slot utilisation — from any browser, anywhere. Staff actions are fully audit-logged."

Data-Driven Admins

Multi-Location
Dental

Message Pillar 7: Dental Intelligence

"Type 'braces' and the bot routes you to Orthodontics. Type 'root canal' and it goes to Endodontics. Even voice notes work — patients send a voice message and our bot understands. MediBook speaks dentistry."

Dental-Specific

Wow Factor

Message Pillar 8: Never Lose a Patient

"When every slot fills up, patients join a waiting list automatically and get a WhatsApp notification the moment a cancellation opens. After each visit, the bot collects a 5-star rating so you always know how you're doing."

Revenue Retention

Patient Satisfaction

Tone of Voice Guidelines

Dimension	We Are	We Are NOT
Personality	Warm, confident, helpful — like a senior doctor friend giving advice	Cold, technical, corporate-speak
Language	Simple English + Hindi phrases where natural (e.g. "seedha WhatsApp pe")	Jargon-heavy ("API", "SaaS", "multi-tenant") in patient-facing material
Claims	Specific and provable ("cut no-shows by 60%", "₹1,999/month")	Vague superlatives ("best-in-class", "world-class")
Urgency	Gentle FOMO — "other clinics in your area are already using this"	Pressure tactics or fake countdown timers
Visuals	WhatsApp green, clean dashboards, real clinic photos	Stock photos of Western hospitals or white-coat models

SECTION 05

Competitive Landscape

Who we compete with, where we win, and where we need to be careful.

Competitor	Category	Pricing (INR/mo)	WhatsApp-Native?	Multi-Tenant?	Our Edge
Practo (Clinic Software)	EMR + Booking	₹5,000–₹15,000	✗ Partial (SMS)	✗	5–8x cheaper; WhatsApp-native; no app needed for patients
eVitalRx	Pharmacy + Billing	₹1,500–₹4,000	✗	✗	Appointment-focused; better bot UX; reminder automation
Clinicspots	Hospital Management	₹8,000–₹25,000	✗	✓ Partial	Faster onboarding; WhatsApp as primary channel
Calendly / Acuity (International)	Generic Scheduling	₹2,500–₹6,000	✗	✗	India-specific; IST-aware; no landing page needed; WhatsApp
WhatsApp Business (Manual)	Status Quo	Free	✓ Manual	✗	Automated 24/7; no missed messages; structured booking data
Custom Built Bots	DIY / Agency	₹50,000–₹5L setup	✓ Varies	Varies	Instant setup; maintained product; fraction of the cost
Docprime / 1mg Clinics	Patient-Facing Marketplace	Commission-based	✗	✗	Clinic owns the patient relationship; no lead-sharing or commissions

Our Unique Moat — The WhatsApp-Native Advantage + Dental Intelligence

Every competitor either requires a new app, a new website, or a new workflow for patients. MediBook requires exactly zero behaviour change from patients. This is our single biggest defensible advantage and must be the centrepiece of every sales conversation.

- **Only WhatsApp booking bot with dental intent shortcuts** — patients type "braces", "root canal", or "whitening" and the bot automatically routes them to the correct dental specialty. No other product does this.
- **Session resumption** — if a patient abandons a booking mid-flow, the bot saves their progress for 24 hours and re-engages them automatically. Lost bookings become completed bookings.
- **Post-appointment feedback loop** — after every visit, the bot automatically sends a 5-star rating request. Dentists see ratings and patient comments directly in the admin dashboard.
- **Voice message support** — patients can send WhatsApp voice notes (e.g. "I need my braces tightened on Friday afternoon"); the bot transcribes via OpenAI Whisper and processes the booking. No competitor offers this.
- **Complete audit trail** — every staff action (login, appointment edit, cancellation, patient record access) is logged with IP address and timestamp. Built for clinic compliance and accountability.
- **Live bot tester in the dashboard** — clinic admins can test the full WhatsApp booking flow inside the browser without any Meta credentials. Demos are instant, friction-free, and impressive.
- **Session resumption** — if a patient abandons a booking mid-flow, the bot saves their progress for 24 hours and offers to resume. Reduces lost bookings significantly.
- **Holiday & doctor leave management** — admins mark clinic holidays and doctor leave ranges; slot generation automatically skips those dates. No double-bookings, no manual cleanup.

When Prospects Mention Practo

- "Practo charges ₹10,000+/month. MediBook starts free."
- "Practo requires patients to download their app. MediBook works on WhatsApp they already have."
- "Practo takes a commission on every patient referral. MediBook doesn't touch your patient relationships."

When Prospects Say "We'll Just Use WhatsApp Business"

- "WhatsApp Business is a great start — MediBook is the next step. It automates what you're doing manually."
- "Who answers WhatsApp at 11pm when a patient wants to book? MediBook does."
- "How do you track no-shows, slot availability, and patient history from WhatsApp chats? MediBook's dashboard does."

💡 **Full Admin Dashboard Feature Set — What Clinic Admins Get**

- **Real-time SSE dashboard** — live appointment updates across all open browser tabs, no page refresh needed
- **Session resumption tracker** — view and manage patients who started but did not complete their booking
- **Patient feedback tab** — all 5-star ratings and comments with filtering; average rating displayed per dentist
- **Calendar view** — month/week appointment calendar with colour-coded appointment statuses
- **Bot tester** — live-test the full WhatsApp booking bot inside the dashboard with no Meta credentials
- **Audit logs tab** — complete log of all staff actions: logins, edits, patient access, cancellations — with IP and timestamp
- **Bulk appointment updates** — mark 50+ appointments as completed or cancelled atomically
- **Holiday management** — mark clinic closures; slot generation automatically skips those dates
- **Doctor leave management** — mark date ranges when a dentist is unavailable; their slots are auto-blocked
- **Dental service catalog** — define treatment types with names, categories, durations, and pricing
- **Patient anonymisation** — delete patient PII while preserving appointment records for compliance (DPDP Act)
- **Role-based access** — Admin, Staff, and Doctor roles with scoped permissions
- **No-show rate analytics** — percentage trend over time and per-doctor breakdown
- **Revenue per dentist** — sum of consultation fees for completed appointments

SECTION 06

SWOT Analysis

Honest assessment of where we stand entering the market.

👉 STRENGTHS

WhatsApp-native — zero patient friction

Multi-tenant architecture scales cheaply

Free trial for all new clients — low barrier to entry

Automatic 24h + 2h reminders reduce no-shows (revenue story)

Works on any smartphone, no new app install

India-specific: IST timezone, Indian date formats

Fully autonomous bot — 24/7 without staff

Schema-isolated data — security & compliance-ready

Live on Railway in days — low infra cost to start

Built on Meta's Cloud API — reliable, scalable

Dental intent shortcuts — "braces"/"root canal" auto-routes to correct specialty

Voice message transcription via OpenAI Whisper — unique in the market

Built-in waiting list — converts full slots into future revenue

Post-appointment 5-star feedback collection — in-product reputation management

Session resumption — saves abandoned bookings for 24h, reduces drop-offs

⚠️ WEAKNESSES

No EMR/billing integration (vs Practo)

Early stage — no case studies or testimonials yet

Meta API dependency (policy changes = risk)

No mobile app for clinic admins (web-only)

Brand awareness is zero at launch

Limited language support at launch (English only)

No offline support — internet required

Small team — limited sales bandwidth

Real-time SSE dashboard — live updates across all open admin tabs

Built-in bot tester — frictionless demos without Meta credentials

Complete audit log — every staff action tracked for compliance

Holiday + doctor leave management — zero double-booking risk

Role-based access (admin / staff / doctor) with scoped permissions

OPPORTUNITIES

500M+ WhatsApp users = massive distribution

68% of clinics still on manual registers

ABDM driving clinic digitisation nationally

Regional language bot (Hindi, Telugu, Tamil, Kannada)

Integration with ABHA health ID

IDA chapters as partner distribution channel

Telemedicine / video consultation tier

Dental chains — multi-branch, enterprise deal

Dental labs, orthodontic appliance suppliers — adjacent verticals

Meta's 2026 BSP incentive program for India

THREATS

Practo / large players launch WhatsApp bot features

Meta changes API pricing or message limits

WhatsApp Business App adds native scheduling

Low-cost competitors copy the model quickly

Doctor trust in new software takes time to build

Data privacy concerns / regulatory changes

Internet reliability issues in Tier 3 cities

High churn if onboarding is poor

Pricing Strategy

Freemium entry, value-based expansion, and transparent pricing builds trust in the Indian market.

Pricing Philosophy

Price against the cost of a receptionist (₹12,000–18,000/month) and the cost of no-shows (₹15,000–40,000/month lost). At ₹1,999/month, MediBook pays for itself by preventing 4–5 missed appointments. Make this calculation explicit in every sales conversation. All new clients start with a free trial — no credit card required.

MOST POPULAR

GROWTH

₹1,999 /month

- ✓ Up to 10 doctors
- ✓ 1,000 appointments/month
- ✓ All bot flows + reschedule
- ✓ Full dashboard + analytics
- ✓ Real-time SSE live dashboard
- ✓ 24h + 2h reminders with pre-visit checklists
- ✓ Session resumption
- ✓ Reminder confirmation tracking (YES/NO)
- ✓ Holiday management
- ✓ CSV export
- ✓ Email support

PROFESSIONAL

₹4,999 /month

- ✓ Up to 25 doctors
- ✓ 5,000 appointments/month
- ✓ All Growth features
- ✓ Doctor leave management
- ✓ Patient 5-star feedback & ratings dashboard
- ✓ Doctor-wise revenue analytics
- ✓ No-show rate analytics (per doctor)
- ✓ Voice message transcription (Whisper)
- ✓ Audit logs + role-based access
- ✓ Dental service catalog management
- ✓ Patient anonymisation (DPDP compliance)
- ✓ Custom bot messages
- ✓ Priority support + onboarding
- ✓ Slot blocking UI

ENTERPRISE

₹9,999 /month

- ✓ Unlimited doctors
- ✓ 99,999 appointments/month
- ✓ All Professional features
- ✓ Custom SLA
- ✓ Dedicated account manager
- ✓ MRR + cross-tenant analytics
- ✓ API access
- ✓ EMR integration support
- ✓ White-label option
- ✓ On-site onboarding

Annual Plan Incentive

- **2 months free** on annual plans (16.7% discount)
- Growth Annual: ₹19,990/year (saves ₹3,998)
- Professional Annual: ₹49,990/year (saves ₹9,998)
- Reduces churn; improves cash flow; signals commitment

Channel Partner Pricing

- **20% recurring commission** for channel partners on all paid plans
- Partners get their own reseller dashboard
- White-label option available for Enterprise resellers
- Co-marketing support for active partners (50+ referrals/year)

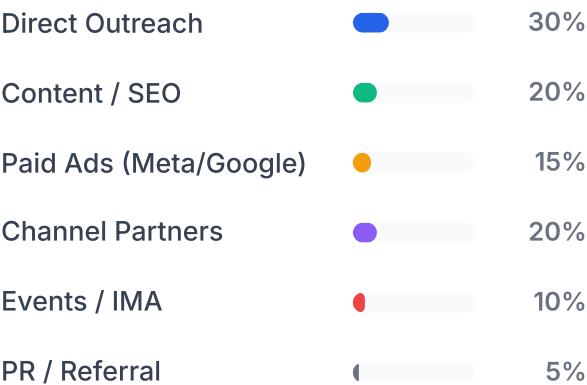

💡 **Promotional Pricing for Launch (Months 1–3)**

- **"Founding Clinic" offer** — First 100 paying clinics lock in Growth plan at ₹999/month for life
- **IDA chapter partner deal** — 30% off for any clinic referred by IDA member (for first 6 months)
- **Referral reward** — Current clinic refers another clinic → both get 1 month free

Marketing Channels & Budget Mix

Channel strategy is weighted toward direct outreach and word-of-mouth in Year 1, shifting to inbound by Year 2.

Channel Budget Allocation (Year 1)

Channel Priority Logic

In Year 1, **trust is scarce**. Indian clinic owners buy from people they trust, not from ads. Hence 50% of budget goes to direct outreach and channel partners (human touchpoints).

From Month 6 onward, as testimonials accumulate, we shift **15–20% more to inbound** (SEO, YouTube, referral loops) to reduce CAC.

Channel 1: Direct WhatsApp Outreach

The irony of using WhatsApp to sell a WhatsApp product — and it works.

- Build a list of clinic WhatsApp numbers from Justdial, Google Maps, Sulekha
- Personalised message from a "doctor friend" persona — not a salesperson
- Share a 60-second video of the bot in action
- Link to free trial signup — zero ask, maximum curiosity
- Follow up in 3 days with ROI calculator
- Target: 500 outreach messages/week per SDR; expect 5% positive response = 25 demos/week

Months 1–12

Low Cost

High Conversion

Channel 2: IDA & Dental Associations

Indian Dental Association (IDA) has 30,000+ registered dental professionals across 200+ district branches and 28 state branches. Every practising dentist in India belongs to IDA. Tapping into IDA chapter networks — through CMEs, annual conferences, and state branch partnerships — gives MediBook direct access to the entire addressable market.

- Become a "Technology Partner" for 3–5 IDA state chapters (negotiate MoU)
- Present at IDA CME events — 15-minute demo slot
- IDA chapter bulk signup deals — 50+ clinics onboarded at once
- Co-branded email campaigns to chapter member lists
- IDA-referred clinics get 30% off Growth plan for life

Months 2–6

High Trust

Volume

Channel 3: Content Marketing & SEO

Long-game inbound — builds compounding traffic from Month 4 onward.

- Target keywords: "WhatsApp appointment booking for clinics India", "reduce patient no-shows India", "clinic management software India"
- Publish 4 blog posts/month on medibook.in/blog
- Case study format: "How Dr. X reduced no-shows by 58%"
- SEO-optimised comparison pages: "MediBook vs Practo", "MediBook vs Clinicspots"
- Free tools: "No-Show Cost Calculator" — viral loop for clinic owners

Months 3–12

Compounding

Low CAC

Channel 4: YouTube / Short-Form Video

Doctors trust educational content. "Show don't tell" is critical.

- YouTube channel: "MediBook — Clinic Automation"
- Videos: Full bot walkthrough, dashboard tour, setup guide (10 minutes)
- Shorts / Reels: 60-second bot demo from patient's perspective
- Instagram Reels targeting clinic owner hashtags (#IndianDoctor, #ClinicLife)
- LinkedIn video posts for hospital administrators and consultants
- Goal: 5,000 YouTube subscribers by Month 6; 20,000 by Month 12

Months 1–12

Trust Builder

Viral Potential

Channel 5: Paid Advertising

Paid goes live only after we have 10+ testimonials to use as social proof.

- **Meta Ads:** Target by profession (Dentist, Dental Clinic Owner) + city
- **Google Search:** Keywords like "appointment booking software clinics India"
- **YouTube Pre-roll:** 15-second bot demo before medical content
- Ad creative: Before/after — "Phone ringing at midnight vs bot handling it"
- Retargeting: Website visitors who didn't sign up → free trial CTA
- Budget: ₹50,000/month from Month 4; scale to ₹1.5L/month by Month 10

Months 4–12

Scalable

Measurable

Channel 6: Referral Program

Word of mouth is the dominant trust channel in the Indian medical community.

- Current clinic refers another → both get 1 month free on Growth/Professional
- Referral link auto-tags both clinics in the system
- In-dashboard referral prompt after first 10 successful bookings
- "Share to WhatsApp" one-tap button with pre-written message
- Monthly leaderboard of top referrers — top 3 get free months + LinkedIn shoutout
- Target: 30% of new signups from referral by Month 6

Months 2–12

Viral Loop

Zero CAC

Channel 7: Channel Partners (Resellers)

Dental equipment vendors, dental EMR software companies, and dental billing software resellers already have clinic trust.

- Target: 20 active reseller partnerships by Month 6
- Partners earn 20% recurring commission on all referred clients
- Co-branded collateral, demo accounts, and dedicated partner Slack
- Partner types: dental equipment dealers (Owandy, Durr Dental), dental supply companies, IDA chapter offices
- Quarterly partner webinar + performance bonus for top performers

Months 2–12

Leverage

Volume at Low CAC

Channel 8: Events & Conferences

Face-to-face credibility is unmatched in Indian B2B selling.

- Exhibit at IDA national conventions, DentExpo India, regional dental CME conferences
- Live demo booth — let dentists try the bot on their own phone in 5 minutes
- **Use the built-in Bot Tester** to run a fully live demo on any laptop — no Meta credentials or real WhatsApp number required. Booth staff can show the complete booking flow instantly.
- Sponsor IDA state chapter CME events (₹20,000–₹50,000 sponsorship = 200+ dentist eyeballs)
- Speak at dental practice management and digitisation panel discussions
- Target: 5 major events in Year 1; 50+ leads per event

Months 3–12

High Trust

Relationship Building

SECTION 09

Content Strategy

Content builds trust at scale. Every piece must serve the doctor persona, not a generic audience.

Monthly Content Calendar Template

Week	Format	Topic
Week 1	Blog Post	"How to reduce patient no-shows by 60% using WhatsApp"
Week 1	LinkedIn Post	Stat graphic: "68% of Indian clinics still use manual registers"
Week 2	YouTube Video	Full MediBook demo — booking flow from patient's phone
Week 2	Instagram Reel	60-second: Patient books appointment without downloading any app
Week 3	Blog Post	Case study: "Demo Clinic cut no-shows from 35% to 12%"
Week 3	WhatsApp Broadcast	Tip of the week to existing clinic admins
Week 4	YouTube Short	"Did you know? Your patients can book at 2am on WhatsApp"
Week 4	Email Newsletter	Monthly product updates + feature spotlight

Content Pillars

Pillar 1: Education

Teach clinic owners about automation, WhatsApp Business API, and digital patient management. Position MediBook as the expert.

Pillar 2: Social Proof

Case studies, video testimonials, before/after statistics from real clinics. Nothing sells better than a real doctor's story.

Pillar 3: Product Updates

Changelog posts, new feature announcements, and "how to use" guides to retain and upsell existing customers.

Pillar 4: Industry News

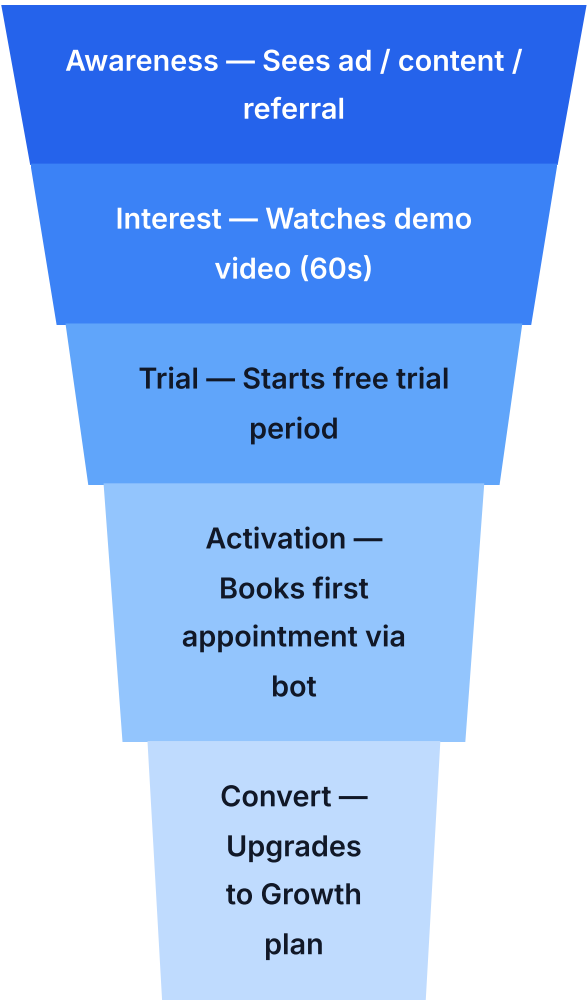

ABDM updates, Meta API news, healthcare digitisation policy — MediBook as the informed guide in the space.

Hero Content Asset: "The 10-Minute Setup Video"

Single most important content piece we can produce. A screen recording showing a real doctor setting up MediBook in under 10 minutes — creating a clinic, adding doctors, setting schedules, and then sending "Hi" on WhatsApp to receive the booking menu. This video goes on the homepage, YouTube, all ads, and the sales deck. Every prospect must watch this before a demo call.

Sales Strategy & Funnel

A consultative, low-pressure sales process built around the trial period and personal demonstration.

Funnel Conversion Targets

Stage	Volume/Month	Conv. %
Awareness Reach	50,000	—
Website Visitors	5,000	10%
Free Signups	250	5%
Activated (bot live)	125	50%
Paid Conversion	38	30%
Retained at 3 months	30	80%

Year 1 Cumulative

If funnel holds from Month 3 onward (months 1-2 are warming up), **~38 new paying clinics/month × 10 months = 380 clinics**. Add early IMA batch deals and channel partners → **500 clinics target is achievable**.

Sales Motion: Product-Led + Human Touch

- Clinic signs up free → automated onboarding email sequence (5 emails over 7 days)
- If not activated by Day 3 → SDR WhatsApp/phone call
- If activated but not upgraded by Day 14 → Account manager reaches out with Growth plan ROI pitch
- Paid clinics get a quarterly check-in call

The ROI Calculator Close

- Ask: "How many patients do you see per day?"
- Ask: "What's your average consultation fee?"
- Calculate: "At 15% no-show rate, you're losing ₹X per day"
- MediBook reduces this by 60% → Monthly savings = ₹Y
- Growth plan = ₹1,999/month. ROI is usually 5–10x in month 1

Trial-to-Paid Conversion Tactics

- In-app banner: "You've handled 50 bookings — unlock 1,000 with Growth"
- Email on Day 10: "Your bot is working. Here's what you're missing on Growth."
- Upgrade incentive: First month of Growth free if upgraded within 14 days
- Social proof in-app: "142 clinics upgraded this month"

Sales Script — WhatsApp Opening Message Template

"Namaste Dr. [Name] 🙏 I'm reaching out because I noticed your dental clinic doesn't yet have automated appointment booking on WhatsApp. We built MediBook specifically for Indian dental clinics – your patients type 'Hi' on WhatsApp, choose a dentist and time slot, and you get a booking in your dashboard – no app download needed. Takes 10 minutes to set up and it's **completely free to start**. Would it be okay if I send you a 60-second demo video? Happy to help you set it up personally if you're interested. 💖 "

Additional Talking Points for Demo Calls

- **"Your patients can even send a voice note saying 'I need my braces tightened' and our bot understands — it transcribes the message and routes them to the right dentist automatically."**
- **"After every visit, the bot automatically asks your patient to rate their experience — 1 to 5 stars. You see all ratings and comments in your dashboard. No chasing Google reviews manually."**
- **"You can demo the full booking experience right now, inside your browser — no Meta account needed. I'll show you the bot tester in the dashboard."** (Use the built-in Bot Tester to demo live to clinic owners without requiring any Meta credentials.)
- **"Every action your staff takes — logins, cancellations, edits — is logged with a timestamp. If a receptionist accidentally cancels an appointment, you can see exactly what happened and when."**
- **"Mark your clinic holidays and doctor leave in the system — the bot stops offering those slots automatically. No double-bookings, no manual checking."**

SECTION 11

12-Month Marketing Roadmap

Phased execution from launch hustle to scalable inbound machine.

PHASE 1 — MONTHS 1-2 (MARCH-APRIL 2026)

Launch & First 50 Clinics

Goal: 50 active trial clinics, 10 paying Growth clinics, first 3 IMA contacts, product-market fit validation.

- Launch medibook.in with homepage, pricing page, and free signup flow
- Produce "10-minute setup" demo video and publish on YouTube
- Begin direct WhatsApp outreach — 500 clinics/week in Hyderabad + Bengaluru
- Set up demo clinic with real data — use for all demos
- Onboard first 10 paying clinics as "Founding Clinics" (₹999/mo for life)
- Attend 1 IDA chapter meeting in Hyderabad — present demo
- Launch referral program in-app
- Set up analytics: Mixpanel for product, PostHog for funnel

50 Trial Clinics

10 Paying

₹10K MRR

PHASE 2 — MONTHS 3-4 (MAY-JUNE 2026)

Expand Outreach & Build Channel Partners

Goal: 150 paying clinics, 5 channel partners, first case studies published, paid ads go live.

- Sign MoU with 2 IDA state chapters (Telangana + Karnataka)
- Publish 3 case studies with real data from Founding Clinics
- Recruit 5 channel partners (2 EMR vendors, 3 medical equipment dealers)
- Launch Meta Ads in Hyderabad + Bengaluru — ₹50,000/month budget
- Expand outreach to Chennai and Pune
- Publish 8 SEO blog posts targeting primary keywords
- Launch LinkedIn company page — daily posts for 60 days
- Hire 2 SDRs for outbound sales

150 Paying

5 Channel Partners

₹50K MRR

PHASE 3 — MONTHS 5–7 (JULY–SEPTEMBER 2026)

⚡ Scale to 300 Clinics — Hindi Language Launch

Goal: 300 paying clinics, Hindi bot launch, expand to Mumbai + Delhi NCR, first enterprise deal.

- Launch Hindi language bot support — unlocks Tier 2 cities and North India
- Expand paid ads to Mumbai, Delhi NCR — ₹1L/month budget
- IDA national conference — exhibit booth + speaking slot
- Sign first enterprise deal (dental chain, 5+ locations)
- Launch "No-Show Cost Calculator" free tool on website
- Reach 5,000 YouTube subscribers
- Channel partners now driving 20% of new signups
- Launch Tamil + Telugu bot support (Tamil Nadu + Andhra Pradesh expansion)

300 Paying

Hindi + Regional

₹1.2L MRR

PHASE 4 — MONTHS 8–10 (OCTOBER–DECEMBER 2026)

🌐 City Expansion + Inbound Maturity

Goal: 420 paying clinics, SEO traffic generating 30% of signups, 20+ channel partners active.

- Expand to Tier 2 cities: Coimbatore, Nagpur, Indore, Jaipur
- SEO pages now ranking for target keywords — 10,000 monthly organic visitors
- Launch ABHA (Ayushman Bharat Health Account) integration
- Referral program generating 30%+ of new signups
- Publish "State of Clinic Automation India 2026" research report — PR push
- YouTube hits 15,000 subscribers — demo videos driving organic signups
- Launch Professional plan upsell campaign to Growth subscribers

420 Paying

Tier 2 Expansion

₹1.8L MRR

PHASE 5 — MONTHS 11-12 (JANUARY-FEBRUARY 2027)

500 Clinic Target — Consolidate & Plan Year 2

Goal: 500+ paying clinics, ₹2 Cr ARR run rate, Year 2 product roadmap announced.

- Cross 500 paying clinics milestone — celebration campaign with customers
- Announce Year 2 roadmap: EMR integration, Kannada/Malayalam bot, video consult
- Launch annual plan push — end-of-year offer (2 months free on annual)
- "Clinic of the Year" awards — PR + social media push
- Evaluate Series A fundraising based on metrics
- Hire Head of Marketing and Head of Sales for Year 2 scale
- Expand channel partner program to 50 active resellers

500+ Clinics

SECTION 12

KPIs & Success Metrics

What we measure, what good looks like, and what triggers action.

Metric	Month 3 Target	Month 6 Target	Month 12 Target	Warning Signal
Paying Clinics (MRR)	50	200	500	Below target by 20% for 2 consecutive months
MRR (₹)	₹1L	₹5L	₹16.7L	MRR growth below 15%/month
Free → Paid Conversion Rate	20%	28%	35%	Below 15% — onboarding/product issue
Monthly Churn Rate	<8%	<5%	<3%	Churn above 10% — immediate customer calls
CAC (Cost to Acquire a Clinic)	₹3,000	₹2,000	₹1,500	CAC above ₹5,000 — review channel mix
LTV (12-month)	₹18,000	₹24,000	₹30,000	LTV:CAC below 3:1
LTV:CAC Ratio	6:1	12:1	20:1	Below 3:1 — unsustainable
Net Promoter Score (NPS)	40	50	60+	Below 30 — immediate product/support review
Referral % of New Signups	10%	25%	35%	Below 5% at Month 6 — referral program broken
Time to First Booking (activation)	<48h	<24h	<12h	Above 72h — onboarding friction
Website Monthly Visitors	2,000	8,000	25,000	SEO ranking drops — audit content
YouTube Subscribers	1,000	5,000	20,000	Video views below 500 avg — review content
No-Show Rate % (clinic average)	<20%	<15%	<10%	Above 25% — reminder delivery issue or patient opt-outs rising
Average Patient Feedback Rating	4.0 ★	4.2 ★	4.5 ★	Below 3.5 ★ — clinic quality or bot UX issue
Reminder Confirmation Rate (YES/NO)	40%	55%	65%	Below 25% — message timing or copy needs review

Metric	Month 3 Target	Month 6 Target	Month 12 Target	Warning Signal
Voice Message Volume (transcriptions/month)	—	Track baseline	5% of bookings	Feature adoption metric; low uptake may need in- bot prompt
Session Resumption Rate	15%	20%	25%	Below 5% — resumption prompt may not be visible enough

Weekly Marketing Review — Must-Track Numbers

- New free signups this week
- Activated clinics (bot live with at least 1 booking)
- Paid upgrades
- Churned clinics + reason
- Outreach messages sent vs responses
- Demo calls booked vs closed
- Average patient feedback rating (across all active clinics)
- No-show rate % (platform average)
- Waiting list conversions this week
- Reminder confirmation rate (YES/NO replies to 24h reminder)

Red Flags That Require Immediate Action

- Churn spike above 10% in any month
- Free-to-paid conversion below 15%
- CAC exceeds ₹5,000
- Time to first booking above 72 hours
- NPS drops below 30
- 3 or more negative reviews on Google/Play Store

Marketing Budget Allocation

Lean Year 1 budget — maximum spend on human outreach, minimum on brand until product-market fit is confirmed.

Category	Month 1–2	Month 3–6	Month 7–12	Year 1 Total	%
Direct Sales (SDR Salaries + Tools)	₹60,000	₹1,60,000	₹3,00,000	₹5,20,000	29%
Content Creation (Video + Blog + Design)	₹30,000	₹80,000	₹1,50,000	₹2,60,000	14%
Paid Advertising (Meta + Google)	₹0	₹1,00,000	₹4,50,000	₹5,50,000	31%
IDA Partnerships + Events	₹10,000	₹60,000	₹1,20,000	₹1,90,000	11%
Channel Partner Program	₹0	₹40,000	₹1,00,000	₹1,40,000	8%
Tools & MarTech (CRM, Analytics, Email)	₹10,000	₹20,000	₹40,000	₹70,000	4%
PR & Miscellaneous	₹5,000	₹20,000	₹30,000	₹55,000	3%
TOTAL	₹1,15,000	₹4,80,000	₹11,90,000	₹17,85,000	100%

💡 Budget Assumptions & Notes

- Total Year 1 marketing budget: **~₹18 lakhs** ($\approx 9\%$ of target ₹2 Cr ARR — lean for a SaaS)
- Month 1–2 is bootstrapped hustle — paid ads only start Month 3 after collecting testimonials
- SDR salaries assume 2 full-time SDRs at ₹30,000/month each from Month 3
- Content creation includes a part-time video editor + freelance copywriter
- Channel partner commissions (20% recurring) are accounted in COGS, not marketing budget
- If MRR target is hit by Month 6, increase paid ads budget 2x for Month 7–12

SECTION 14

Risks & Mitigation Strategies

Honest identification of what could go wrong and what we'll do about it.

Risk	Probability	Impact	Mitigation
Meta changes WhatsApp API pricing / policy	Medium	High	Monitor Meta developer news weekly. Build SMS fallback for reminders. Negotiate with multiple BSPs (Business Solution Providers) for redundancy.
Practo / large competitor launches a WhatsApp bot	Low–Medium	High	Speed advantage — get to 500 clinics before they react. Our multi-tenant architecture and India-specific UX creates a moat. Large players are slow to pivot.
Low free-to-paid conversion (product doesn't retain)	Medium	Medium	Week 1 hands-on onboarding call for every new clinic. In-app guides. Track activation metric (first booking) relentlessly. Fix every onboarding friction point before scaling ads.
High churn in early months	Medium	High	Quarterly success calls with every paying clinic. Build an NPS survey trigger at 30 days. Churn reason tagging — understand patterns before they become trends.
Doctors reluctant to trust new software	High	Medium	Free tier removes financial risk. Personal demo from a founder/senior team member for first 50 clinics. Doctor-to-doctor testimonial videos. IMA trust signals on website.
Team bandwidth — can't handle support + growth	Medium	Medium	Automate support with an FAQ WhatsApp bot for MediBook itself. Build self-serve onboarding. Hire SDRs and a support person before scaling ad spend.
Cash flow — slow enterprise deal cycles	Low	Medium	Focus Year 1 on SMB (solo practitioners and small clinics) — faster decision cycles. Annual plan incentive improves cash flow. Enterprise deals are bonus, not base plan.

The MediBook Marketing North Star

☀️ One Thing to Remember in Every Marketing Decision

Indian clinic owners don't buy software. They buy **solutions to problems they feel every day**. The phone ringing at 2am. The patient who was a no-show but didn't call. The receptionist who left. The WhatsApp message that went unread.

Every piece of content, every ad, every cold message must speak to those moments — not to features, not to technology, not to our architecture. When a doctor watches our 60-second demo and thinks *"I need this"*, we've won. Everything else is execution.
