

WhatsApp-native appointment booking SaaS for Indian dental clinics — no app downloads, no missed calls, no no-shows. Get your clinic live on WhatsApp in under 24 hours. Free trial included.

WHAT MEDIBOOK DOES

- 

Patients book appointments by chatting on WhatsApp — no app download, no forms, no hold music. Dental intent detection lets patients type "root canal", "braces", or "whitening" and the bot auto-selects the right specialty. Voice messages are transcribed via OpenAI Whisper and processed as text. Natural date shortcuts ("tomorrow", "Monday") are resolved automatically.
- 

Each dental clinic or chain gets their own WhatsApp bot, admin dashboard, and isolated PostgreSQL schema. True multi-tenant SaaS — one platform serving hundreds of dental practices simultaneously. Incomplete bookings are saved and resumed within 24 hours; when slots are full, patients join a waitlist and are notified via WhatsApp when a slot opens.
- 

Automated WhatsApp reminders at 24 hours and 2 hours before every visit, with department-specific pre-visit checklists. Bot tracks patient YES/NO confirmation replies. Post-appointment 5-star rating and comment collected automatically via WhatsApp — no staff effort required.
- 

Clinic admins manage doctors, schedules, appointments, and patients via a Next.js dashboard with real-time SSE live updates, analytics (no-show rates, revenue per dentist, average feedback rating), CSV export, bulk actions, and calendar view.
- 

Dedicated portals for dentists (today's schedule) and reception staff (check-in). Dental service catalog with custom pricing (cleanings, root canals, implants, braces). Holiday and doctor leave management auto-blocks affected slots. Role-based access (admin/staff/doctor) with full audit logs.

WHAT'S INCLUDED IN YOUR PLAN

- 

WhatsApp booking bot — Patients book, reschedule, and cancel by messaging your clinic. Dental intent detection, voice message support (Whisper), session resumption, emergency shortcut, and STOP/START opt-out built in
- 

Admin dashboard — Real-time SSE live updates, calendar view, bulk appointment actions, bot tester, and audit logs — all in one web portal
- 

Doctor & reception portals — Dentist sees today's schedule; reception staff handles walk-in check-ins with role-based permissions
- 

Automated reminders + feedback — WhatsApp reminders at 24h and 2h with department-specific pre-visit checklists; 5-star post-appointment rating collected automatically
- 

Slot generation engine — Schedules auto-generate from each doctor's working hours; holiday and doctor leave management auto-blocks affected slots
- 

Waiting list management — When slots fill up, patients auto-join a waitlist and receive a WhatsApp notification the moment a slot becomes available
- 

Patient feedback system — 5-star ratings and comments collected via WhatsApp after every appointment; viewable in the analytics dashboard
- 

Dental service catalog — Define your services, durations, and fees (General Cleaning, Root Canal, Braces, Implants, Whitening, etc.) for accurate booking and pricing
- 

Audit logs & staff roles — Role-based access for admin, staff, and doctor; every login, edit, and cancellation is logged for compliance
- 

Multi-branch support — Manage multiple clinic locations under one account on Growth plan and above
- 

Booking confirmations — Instant WhatsApp + email confirmation via Resend sent to every patient on booking
- 

Analytics & CSV export — No-show rates, revenue per dentist, average feedback rating, appointment trends by doctor/day/status; export patient lists anytime
